

HYGIENE & SANITATION

# DOMETIC MODERNO TOILET WITH VARIFLUSH TECHNOLOGY

Dometic Moderno with VariFlush technology is revolutionizing sanitation with its comfort, convenience, and innovative variability. VariFlush technology provides the ability to use any of four different dynamic flushing technologies, VacuFlush, MasterFlush, RushFlush, or Gravity. A single bowl design with such flexibility sets this toilet apart from all others. Moderno uses Dometic's new HandWave Toilet Control Panel, allowing a user's simple hand gesture to flush or refill the toilet without physically touching anything, thereby reducing the spread of germs. The capacitive touch display with aesthetic backlighting and intuitive icons offer a fresh approach to lavatory use. Dometic's Moderno toilet and control panel provide premium elegance, comfort and innovation with vast possibilities.

# LUXURY & INNOVATION

For an elegant look and easy, convenient cleaning, Moderno features a full-china smooth-contour elongated bowl with sleek, modern styling. The standard-height, slow-close seat and wraparound lid provide luxurious residential comfort. Moderno's VariFlush technology accommodates all of Dometic's popular flushing technologies: VacuFlush Using the most water-efficient flushing method available, bowl contents are powerfully pulled from the toilet via a vacuum generator and pushed to the holding tank. MasterFlush—Offering normal or "dry-bowl" flushing, powerful motorized blades thoroughly macerate waste into a viscous slurry before the waste goes to the holding tank. RushFlush—High-velocity water jets simultaneously rinse the bowl, macerate, and drive waste to the discharge plumbing. Gravity Flush—An age-old standard used if discharge plumbing is directly below the toilet.

## KEY BENEFITS

- VariFlush technology offers versatility
- Slow-close seat and lid provide silent performance
- Smooth-contour bowl simplifies cleaning
- Standard-height profile for residential comfort
- Available in 12V DC or 24V DC, white or bone colors.
- Optional bidet seat available in white only

### HANDWAVE CONTROLS

Touchless operations improves hygiene

### SLOW CLOSE SEAT
